

Integrated Quality, Environment Health and Safety Policy

The Management of the Company has decided to implement, certify and keep active an Integrated Management System for Quality, Environment, Health and Safety according to ISO 9001, ISO 14001 and ISO 45001, in order to guarantee that all company processes will aim at the creation of products and services of excellent quality while respecting the health and safety of the employees and the surrounding environment with constant attention to complete customer satisfaction.

The Management of Colmec Spa therefore undertakes to:

- Ensure compliance with mandatory regulations by ensuring legislative compliance in the fields of health and safety, the environment and quality and periodically verify their timely implementation.
- Provide human and instrumental resources needed to effectively implement the system.
- Pursue the continuous improvement of environmental performance by reducing the use of hazardous substances and by applying careful waste management.
- Pursue continuous improvement of safety in the production processes by analyzing staff reports and records of near-miss incidents, then introducing, where appropriate, specific corrective actions.
- Pursue the continuous improvement of product and service quality by constantly investing in research and development of safe, innovative and environmentally friendly products and services.
- Promote adequate awareness and training of employees so that they can provide their own personal contribution to the maintaining the system and its continuous improvement.
- Design and manufacture high technology machines tailored to customer needs.
- Build reliable products and provide high quality services with a focus on customer satisfaction.
- Ensure that emergencies are tackled in the most effective way with respect to safeguarding of staff and the environment while maintaining business continuity.
- Raise awareness of the importance of compliance with environmental and safety requirements including all suppliers and those who access the company's site.

All of the above is consider a "risk based thinking" approach.
